Dear Senator Coons,

This is a request that you join Vice-president Biden in the actions requested per the enclosed letter to him of 15 September 2014.

<https://tffuture.org/blog/1181/motherless-mothers-violence-brain-disorders>

The various requests made in that letter have been ignored and are repeated herein.

Specifically,

The letter of 15 September 2014 to Vice President Biden and Senators Carper and Coon enumerated:

- A chronology of research activities on child abuse and neglect by the NICHD;
- The Directive of Secretary Weinberger to federal agencies to implement these policies;
- The ultimate betrayal and abandonment of this Congressional and DHEW Secretarial Directives by the NICHD;
- The efforts by Health Scientist Administrator Dr. Prescott, over the past some forty years, to comply with these Directives;
- His unlawful termination for defense of these Congressionally mandated programs;
- And his efforts that continue to this day to hold accountable the NICHD/NIH accountable the violations of Public Law that has propelled this Nation into a death spiral of violence.

The psychopathology of early life experiences initiate the pathology of brain-behavioral disorders that last a lifetime, many, of which, are noted in my letter to VP Biden.

## **Specifically terminated NICHD programs established:**

1. Cerebellar brain damage in adult pathologically violent primates deprived of mother love.  
<https://vimeo.com/71761209> 2 Min

2. Abnormal electrical discharges, called “spiking” in the Septum--a subcortical emotional brain structure known to mediate violent behavior in mother deprived primates.  
<http://www.violence.de/heath/bfm/article.html>

**What NICHD research programs have evaluated cerebellar and Septal brain damage in depressed / violent abused and neglected children and adults?**

**The above facts and questions must be addressed by Dr. Collins, Director, NIH.**

**The abandoned research on child abuse and neglect by the NICHD has prevented an answer to these questions that should have been answered generations ago.**

**The failure of Culture to support Women, as Nurturing Mothers, is the principal cause of a Culture of Violence that threatens human survival.**

- ***THE CHILD IS THE FATHER OF THE MAN***
- ***THE CHILD IS THE MOTHER OF CULTURE***
- ***THE CHILD IS THE FUTURE OF HUMANITY***

On this 52<sup>nd</sup> year after the birth of the NICHD, I am calling for all Citizens to write their Congressional Representatives to take corrective actions of this betrayal and abandonment of Mothers, Children and the Family—the future of HUMAN Civilization-- by the NICHD / NIH.

The letter of 22 December 2014 to Dr. Collins from Congressmen/Congresswomen Lucille Roybal-Allard; Dina Titus; Eliot L. Engel and Sam Farr requested a reply from Dr. Collins on the history of NICHD primate research involving maternal-infant separation and deprivation by Feb 27, 2015 that raised questions about the scientific and ethical justification for these particular experiments, attached.

A more complete description of these programs can be found at:

[http://ttfuture.org/bonding/dvd\\_archive/overview](http://ttfuture.org/bonding/dvd_archive/overview)

I am requesting from you; Senator Carper; and Vice-President Biden to call for Congressional Hearings on this letter and that I be called as an expert witness on the history of this program.

The Republican controlled Senate Judiciary Committee may be more responsive to these issues than the Senate Judiciary Committees of the past, although past history has not been responsive.

A brief Biography is attached for your review.

Your transmittal this letter with attachments to Senator Carper and Vice-President Biden is requested.

Respectively,

James W. Prescott, Ph.D.  
Director

Cc: Senator Carper, Vice-President Biden
