

The evidence mounts: vaccines are a major cause of disease.

In 1960 six-percent of children had a chronic illness. In 1980 the number rose to ten-percent. Between 1986 and today, after vaccine manufacturers were granted full immunity from injury liability, the number of children with chronic illness stands at fifty-four percent.

[Vaccines can cause autoimmune diseases](#)

Yes, vaccines do cause autoimmune diseases. It's no secret. The government has known this for decades and has even published books and reports about it. Government Scientists Have Known This for Decades – Arthritis Example In 1991, the government's own Institute of Medicine released a report entitled "Adverse Effects of Pertussis and Rubella Vaccines". In [...]

[Vaccines Containing Animal, Plant, Fungal Proteins Cause Autoimmune Diseases and Cancer](#)

Vaccines containing animal, plant or fungal proteins are extremely dangerous and cause numerous autoimmune diseases and cancer. All non-target proteins in vaccines must be immediately removed using processes such as affinity chromatography.

[RFK, Jr. Responds to Daniel Pinchbeck: The Historical Role of Vaccines in Eliminating Infectious Disease Mortality](#)

After Pinchbeck writes that he has "not seen convincing evidence" to support arguments that societal improvements, not vaccines, played a significant role in the disappearance of childhood diseases, RFK, Jr. lays out the evidence in a letter to Pinchbeck.

[Since COVID Vaccines Are Experimental, Vaccine Administrators Must Inform You of Risks](#)

In the U.S., vaccines granted Emergency Use Authorization by the FDA, as is the case with the Pfizer and Moderna COVID vaccines, are considered experimental. Administrators of emergency use vaccines are required by law to inform vaccine recipients of the potential risks.

[One-Third of Deaths Reported to CDC After COVID Vaccines Occurred Within 48 Hours of Vaccination](#)

The numbers reflect the latest data available as of Feb. 12 from the CDC's Vaccine Adverse Event Reporting System website. Of the 929 reported deaths, about one-third occurred within 48 hours.

[Are We on the Verge of a 'Super-Epidemic' of Autoimmune Diseases?](#)

Some of the world's leading immunologists blame exposure to SARS-CoV-2, others blame the experimental COVID vaccines — but could both potentially cause a devastating super-epidemic of autoimmune disease?

[What VAERS Data Reveal About Cardiac-Related Reactions to COVID Vaccines](#)

As of Feb. 4, 1,171 cases of cardiac-related reactions were reported to VAERS, including 134 cases where the patient died — or 21% of the total COVID vaccine deaths reported to VAERS.

[Using Herd Immunity Myth to Justify COVID Vaccines for Kids Is Deceptive — and Dangerous](#)

COVID poses almost no risk to children. Yet the push is on to mandate COVID vaccines for all children, with little or no consideration for the health risks of the experimental vaccines.

[Could Spike Protein in Moderna, Pfizer Vaccines Cause Blood Clots, Brain Inflammation and Heart Attacks?](#)

Dr. J. Patrick Whelan, a pediatric rheumatologist, warned the FDA in December that mRNA vaccines could cause microvascular injury to the brain, heart, liver and kidneys in ways not assessed in safety trials.

[Doctors Link Pfizer, Moderna Vaccines to Life-Threatening Blood Disorder](#)

A second New York Times article quotes doctors who say the mRNA technology used in COVID vaccines may cause immune thrombocytopenia, a blood disorder that last month led to the death of a Florida doctor after his first dose of the Pfizer vaccine.

[Immunologist: Pfizer, Moderna Vaccines Could Cause Long-Term Chronic Illness](#)

In new research published in Microbiology & Infectious Diseases, immunologist J. Bart Classen warns the mRNA technology used in the Pfizer and Moderna COVID vaccines could create “new potential mechanisms” of adverse events that may take years to come to light.

[3 Perspectives on Risks, Benefits of COVID Vaccines](#)

Global Research News Hour interviewed three guests, including Children’s Health Defense President Mary Holland, on their varying views about the potential risks and benefits of the Pfizer-BioNTech and Moderna COVID vaccines.

[Cardiothoracic Surgeon Warns FDA, Pfizer on Immunological Danger of COVID Vaccines in Recently Convalescent and Asymptomatic Carriers](#)

Dr. Hooman Noorchashm says FDA, Pfizer and Moderna must consider the danger COVID vaccines pose to the recently convalescent or asymptomatic carriers of SARS-CoV-2 — especially the elderly, frail or anyone with significant cardiovascular risk factors.

[Vaccines do not deserve the credit for reducing contagious diseases](#)

This sounds crazy, but it’s true. Vaccines do not deserve the credit for reducing contagious diseases. How do we know this? Government Data Proves Vaccines Do Not Deserve the Credit for Reducing Contagious Diseases All we have to look at is the government’s own numbers from the Vital Statistics of the United States. It tells [...]

[Vaccines can spread diseases through shedding.](#)

Vaccines are supposed to protect vulnerable people from disease. However, vaccines can actually spread disease. This is a well known phenomena called shedding. People who get the vaccine, and don’t get sick from it, can actually spread the virus to other people. Here’s more detail: Vaccines Using Live Viruses Spread Through Shedding Measles, mumps, rubella, [...]

[Vaccines do not reliably prevent disease](#)

There are many examples of vaccinated people who get the very disease that they were vaccinated against. Let’s just look at measles as an example. People Who Get the Measles Vaccine Still Got Measles According to the CDC, there were 1,249 reports of measles cases in 2019. 142 were in people who were vaccinated. 235 may [...]

[The government has paid over \\$4 billion to families whose children were injured by vaccines. Getting paid is difficult. The government is both the defendant and the judge.](#)

How Much Has the Government Paid? The Most Recent Data Report from the National Vaccine Injury Compensation Program Data Report (PDF – 246 KB) – updated September 1, 2020 states: Updated monthly, and includes the number of: petitions filed, adjudications compensated and dismissed, awards paid by type and amount, claims by vaccine, and adjudication categories [...]

[Vaccines contain dangerous ingredients. Small doses can be unhealthy. Disease is a product of genetics and environment.](#)

Types of Vaccine Ingredients To help understand vaccine ingredients it's useful to divide them into 3 parts. The vaccine substrate (how it's grown) The antigen itself (what is designed to create an antibody response) Excipients, stabilizers, adjuvants, etc. (other ingredients the vaccine contains to make it stable or last or stimulate a better immune response) [...]

[CHD Appeals to U.S. Supreme Court to Stop New York From Excluding Kids With Medical Exemptions for Vaccines From Online Education](#)

After CHD and seven families sued the New York State Department of Health for refusing to let unvaccinated children with valid medical exemptions attend school, the state then also excluded the children from online learning.

[Vaccine makers do not use placebos to test the safety of their vaccines for kids](#)

What is a Placebo? A placebo is defined as a substance or treatment which is designed to have no therapeutic value. Common placebos include inert tablets (like sugar pills) and inert injections (like saline). Here is a sampling of some pediatric vaccines. You will note that almost without exception, sugar pills, saline or other inert [...]

[California Man Dies Several Hours After Receiving COVID Vaccine, Cause of Death Unclear](#)

As of Jan. 15, 181 deaths have been reported to the U.S. government's Vaccine Adverse Events Reporting System as possibly being related to COVID vaccines.

[Aluminum Content of Pediatric Vaccines 'Absurdly High,' New Book Says](#)

Biochemistry professor Chris Exley's book, "Imagine You Are an Aluminum Atom," sheds light on the harmful impact of aluminum on human health, including how its use in vaccines harms children.

[China Health Experts Call for Suspension of COVID Vaccines as Norway Investigates 33 Deaths, Germany Probes 10 Deaths](#)

Norway upped the number of deaths under investigation, from 23 last week to 33, while in Germany, health officials said they are investigating 10 deaths that occurred among elderly patients who received the COVID vaccine.

[WHO: No Guarantee COVID Vaccines Will Prevent People From Being Infected](#)

At a virtual press conference held by the World Health Organization officials warned there is no clear evidence COVID-19 vaccines are effective at preventing asymptomatic infection and transmission.

[Bell's Palsy and Vaccines: What's the Connection?](#)

Pfizer and the FDA downplayed the cases of Bell's palsy in COVID vaccine trial participants. But the evidence that vaccines, including COVID and flu, cause the disorder deserves further investigation.

[Johns Hopkins Scientist: 'A Medical Certainty' Pfizer Vaccine Caused Death of Florida Doctor](#)

Dr. Jerry L. Spivak, an expert on blood disorders at Johns Hopkins University, told the New York Times Tuesday that he believes "it is a medical certainty" that Pfizer's COVID vaccine caused the death of Dr. Gregory Michael.

[COVID Ushers in Brave New World of Vaccines](#)

In his video report, "The Future of Vaccines," investigative journalist James Corbett reviews how the novel COVID-19 vaccine is paving the way for non-consensual medical experimentation on the general public.

[In Rush to Create Magic-Bullet COVID Vaccines, Have We Made Matters Worse?](#)

Study that found vaccines that don't prevent viral transmission may accelerate evolution of more virulent strains could mean leading vaccine candidates may make COVID crisis worse.

[New York Times Declines My Rebuttal to Defamatory Op-Ed on COVID Vaccines](#)

On Dec. 30, 2020, the New York Times published an opinion piece by my niece, Dr. Kerry Meltzer. Although the piece contained factual errors and defamatory accusations, the Times declined to publish my letter to the editor correcting those false claims.

[Peter Doshi: Pfizer and Moderna's '95% Effective' Vaccines — We Need More Details and the Raw Data](#)

Peter Doshi outlines new concerns about the trustworthiness and meaningfulness of the reported efficacy results of Pfizer's and Moderna's COVID-19 vaccine trials.

[Read the Fine Print: Vaccine Package Inserts Reveal Hundreds of Medical Conditions Linked to Vaccines](#)

To facilitate parents' use of the information buried in small print in the package inserts, Children's Health Defense has conducted a comprehensive review of the adverse events reported in Section 6.2 for all vaccines currently included in the U.S. childhood and adolescent vaccine schedule.

[New Safety Concerns Raised About the Quantities of Aluminum in Childhood Vaccines](#)

A 2011 FDA study that looked at the safety of using aluminum in infant vaccines concluded that "episodic exposures to vaccines that contain aluminum adjuvant continue to be extremely low risk to infants and that the benefits of using vaccines containing aluminum adjuvant outweigh any theoretical concerns." However, Physicians for Informed Consent recently took another look at the paper and found that a critical math error was made which negates the FDA's conclusion.

[Molecular mimicry: Body Confusion of "Self" and "Non-Self" \(More Evidence on HPV Vaccines and Autoimmunity\)](#)

The powerful government-pharmaceutical industry partnership that has been foisting human papillomavirus (HPV) vaccination on girls and boys around the world since 2006 now has working-age adults within its sights. Merck's Gardasil 9 received U.S. Food and Drug Administration (FDA) approval for expanded use in the 27-45 age group in late 2018, and there are signs that a campaign is afoot to achieve the same end result in other countries.

[Rubber Stamping—The FDA and Vaccines—Conflicts of Interest Undermine Children's Health: Part IV](#)

The vaccine industry has been burgeoning since the late 1980s, when Congress passed the National Childhood Vaccine Injury Act (NCVIA) that provided manufacturers with blanket immunity from liability. Two regulatory agencies have played a pivotal role in this vaccine "renaissance": the U.S. Food and Drug Administration (FDA) and the Centers for Disease Control and Prevention (CDC). Working hand in glove with vaccine companies, these agencies have helped protect and grow the liability-free childhood vaccine market, ensuring billions of dollars in corporate revenues with little need for vaccine makers to even advertise or market their products.

[Vaccines: Gateway Drugs by Design](#)

Why is there an epidemic of chronic illnesses that plagues 54% of our children today? Why do so many of our children suffer from ADHD, anaphylaxis from severe allergies, asthma, autoimmune diseases and epilepsy, in addition to other chronic illnesses and neurodevelopmental disorders? These questions remain largely unanswered and mostly ignored by the medical establishment as the numbers of children suffering from these conditions continues to rise.

[The Impact of Vaccines on Mortality Decline Since 1900—According to Published Science](#)

Why did the mortality rate decline so precipitously? If you listen to vaccine promoters, the answer is simple: vaccines saved us. What's crazy about this narrative is how easy it is to disprove, the data is hiding in plain sight. The fact that this easily-proven-false narrative persists, however, tells us a lot about the world we live in, and I hope will encourage parents to reconsider the veracity of many of the narratives they've been fed about vaccines, and do their own primary research.

[Is Arthritis in Childhood Becoming the "New Normal"—Are Vaccines to Blame?](#)

For people who think of arthritis as a disease of the elderly, learning that children also suffer from arthritic conditions may come as a shock. Across age groups, various forms of arthritis are a growing

public health problem in the United States. New cases of juvenile rheumatoid arthritis and other types of autoimmune arthritis in young Americans are two to three times higher than in Canada, with cases occurring within the wider context of proliferating pediatric autoimmune disorders.

[How the CDC Uses Fear to Increase Demand for Flu Vaccines](#)

The US Centers for Disease Control and Prevention (CDC) claims that tens of thousands of people die annually from the flu, but what the public isn't told is that these numbers come from controversial models that may greatly overestimate, which happens to align with the CDC's stated aim of using fear marketing to increase demand for flu vaccines.

[The Plausible Connection between Vaccines and SIDS](#)

In January 2018, media outlets reported the embarrassing news that children born in the United States are 76% more likely to die before their first birthday than infants born in 19 other wealthy countries. This clear-cut finding emerged from a cross-national study published in Health Affairs by medical researchers at Johns Hopkins and two other leading U.S. teaching hospitals.

[Milk containing vaccines cause milk allergies, EoE, autism and type 1 diabetes](#)

Food proteins in vaccines can sensitize the immune system and trigger development of food allergies and other chronic conditions such as autism and type 1 diabetes.

[Cancer immunology, bioinformatics and chemokine evidence link vaccines contaminated with animal proteins to autoimmune disease: a detailed look at Crohn's disease and Vitiligo](#)

The contamination of vaccines with animal proteins that resemble human proteins can trigger autoimmunity.

[Yeast in Vaccines Tied to Autoimmune Diseases](#)

It's well-recognized that the incidence of autoimmune diseases has been rising at an enormous rate. A study indicates that a significant factor in causing them may be the common bakers or brewers yeast, *Saccharomyces cerevisiae*[1] used in many vaccinations, including HepB, which is given to nearly all newborn babies in the United States before they're a day old.

[Vaccines as a Trigger for Early-Childhood Febrile Seizures](#)

Febrile seizures (also called febrile convulsions) occur in young children in conjunction with fever and are the most common type of childhood seizure. Somewhere between two and five percent of American children will have at least one febrile seizure by age five, and anywhere from 23% to 43% of those will experience a recurrence.

[Diseases with Unknown Etiology Trace Back to Mass Vaccination Against Influenza in 1976](#)

Crohn's. Lupus. Autism. ADHD. Food allergies. Celiac disease. Sjögren's syndrome. Polymyalgia rheumatica. Multiple sclerosis. Ankylosing spondylitis. Type 1 diabetes. Vasculitis. Peripheral neuropathy. The list goes on, and on, and on. We are being increasingly diagnosed with these conditions and diseases of unknown origin, and science has very little to say – why would autoimmune diseases and mysterious diseases of inflammation be so prevalent? When did this increase start?

[New study: Vaccine Manufacturers and FDA Regulators Used Statistical Gimmicks to Hide Risks of HPV Vaccines](#)

A new study published in Clinical Rheumatology exposes how vaccine manufacturers used phony placebos in clinical trials to conceal a wide range of devastating risks associated with HPV vaccines. Instead of using genuine inert placebos and comparing health impacts over a number of years, as is required for most new drug approvals, Merck and GlaxoSmithKline spiked their placebos with a neurotoxic aluminum adjuvant and cut observation periods to a matter of months.

And this is just the tip. MM
